DATA SHEET · PGF COMMUNITY

Supported open-source PostgreSQL, without the guesswork

PgF Community

The starting point for organizations that want to run pure community PostgreSQL with a trusted partner behind them. PgF Community covers every non-EOL PostgreSQL version and the proven open source tools your teams already use, so there is nothing proprietary to learn and nothing to lock you in.

All	**8x5**	**Add-on**	**0**
Non-EOL PostgreSQL versions supported	LTS support during business hours	Support for end-of-life PostgreSQL versions	Proprietary forks: pure community PostgreSQL

01 What's included

Expert LTS support, 8x5

Postgres1st engineers help you install, configure, troubleshoot and keep databases on supported releases.

Every supported version

Coverage for all non-EOL PostgreSQL versions, so you can standardise on the release that fits.

Open source tools

The proven open source tools and extensions your teams already know, with no proprietary layer.

EOL support add-on

Keep older systems supported while you plan upgrades on your terms.

02 Built for

Development and test
Environments that need expert help without a 24x7 commitment

Early production workloads
Applications getting started on PostgreSQL in production

Teams new to PostgreSQL
Organizations standardising on PostgreSQL for the first time

sales@postgresfirst.com 1800 123 7197 postgresfirst.com

03 Open source tools and extensions

PgF Community keeps you on the open PostgreSQL ecosystem. Postgres1st engineers help you adopt and govern proven community extensions, such as:

- **pgcrypto** for cryptographic functions and column-level protection
- **pg_stat_statements** for query visibility and performance investigation
- **auth_delay** and passwordcheck-style controls for authentication hardening
- **pgaudit**-style audit logging for session and object access trails
- **postgres_fdw** for governed cross-database access during transitions

04 Grow when you're ready

Move to PgF Standard or Enterprise as your needs grow, without migrating data or rewriting applications.

Capability	Community	Standard	Enterprise
PostgreSQL LTS support	8x5	24x7	24x7
Sev 1 response / remedy	—	30 min / 24 hrs	15 min / 4 hrs
Open source tools	Yes	Yes	Yes
WatchTower, DataGuardian, CopyCascade	—	Yes	Yes
Transparent Data Encryption	—	Yes	Yes
Performance advisory	—	Core	Full engineering
PGF Enterprise Server, multi-master	—	—	Yes
Advanced security and PGF Pal AI	—	—	Yes

05 Beyond the subscription

Training and certification
Essentials (3-day) and Advanced (5-day) courses with matching certification exams

Migration services
Move from proprietary databases to PostgreSQL with expert help

Managed services
Remote or onsite DBA support when you need extra hands
